PROFESSIONAL SUMMARY

Ambitious engineer with a growing foundation in automotive electronics and 2 months of experience. Adept at project coordination and focused on achieving excellence through innovative problem-solving and continuous skill development

PROFESSIONAL EXPERIENCE

Harita Techserv Pvt Ltd

Nov 2024 - Present

Technical Support Engineer

- Delivering in-depth training programs to engineers in automotive electronics, emphasizing CAN bus systems, infotainment, in-vehicle networking, ADAS, and ECU operations using test bench setups and advanced tools.
- Guiding engineers to build expertise in automotive protocols, system validation processes, and in-vehicle networking concepts.
- Specializing in CAN bus diagnostics, data acquisition, SIL/HIL testing, and developing test cases to ensure comprehensive system validation.
- Overseeing complex projects with a focus on meeting deadlines while maintaining exceptional quality standards.
- Utilizing strong communication and leadership skills to drive cross-functional teamwork and nurture client partnerships.
- Continuously enhancing training materials to incorporate cutting-edge automotive technologies and emerging industry trends.

SKILLS & EXPERTISE

- Experienced in simulating **CAN Restbus** and monitoring CAN messages using tools like **TSMaster**, with expertise in **SIL/HIL testing**, test case creation, and automation.
- Proficient in tools such as **TSMaster**, **Vector CANdb++**, and Arduino IDE for ECU and system validation. Deep knowledge of automotive ECUs, including **EMS**, **BCM**, **RKE**, **ICU**, **TCU**, **ADAS**, and infotainment systems, with a focus on in-vehicle networking and communication standards.
- Proficient in working with microcontrollers such as **PIC16F887** and **STM32F407**, with practical experience in programming and integration.
- Skilled in various communication protocols including **UART**, **I2C**, **SPI**, and **CAN**, ensuring seamless data communication in embedded systems. Expertise in Embedded C programming, with a strong adherence to **MISRA C** standards to develop reliable and safe embedded software
- Web Development: Knowledgeable in **HTML**, **CSS** and **JavaScript** for creating user-friendly web interfaces.

ACHIVEMENTS

- Conducted a Faculty Development Program at Mahendra Engineering College, enhancing the curriculum on automotive electronics.
- Secured "Early - Bird Prize Winner" on EW Project Challenge 2022 conducted by Mouser Electronics

PROJECTS

- Centralized Status Alert System
- Obstacle Detection Robot
- IoT-Enhanced Accident-Avoidance System
- CAN database development

EDUCATION & CERTIFICATIONS

Bachelor of Engineering -EEE **2020-2024**

Institute: Bannari Amman Institute of Technology,
Sathyamangalam

CGPA-7.98

SSLC AND HSC **2018-2020**

School: Adharsh Vidhyalaya Matriculation Higher Secondary
School

SSLC-73%

HSC-63%
